6th of October, Giza, EG

Junior Penetration Tester and Application Security enthusiast with hands-on experience in web application penetration testing, vulnerability assessment, and code review. Skilled in identifying and exploiting vulnerabilities including SQL Injection, XSS, CSRF, SSRF, and XXE. Proficient with industry-standard security tools: Burp Suite, Nmap, Metasploit, and Wireshark. Familiar with SAST and DAST concepts, threat modeling methodologies (STRIDE), and security standards including OWASP. Experienced in writing structured penetration testing and vulnerability assessment reports with CVSS risk ratings and actionable remediation recommendations. Seeking an application security and penetration testing internship to apply skills in real-world security engagements.

Work Experience

Intern Cybersecurity Engineer – Vulnerability Analyst & Penetration Tester

Nov 2025 - Present

DEPI (Digital Egypt Pioneers Initiative)

- Performed web application penetration testing and application security assessments targeting OWASP Top 10 vulnerabilities: SQL Injection, XSS, CSRF, SSRF, and XXE.
- Conducted vulnerability scanning and network security assessments using Nmap for host discovery, port scanning, and service enumeration; exploited findings using Metasploit Framework.
- Performed source code review on the Hackazon vulnerable web application to identify SSRF vulnerabilities, analyzing insecure code patterns and producing secure coding recommendations.
- Executed a full black-box penetration test on TryHackMe VulnNet: reconnaissance, LFI exploitation, PHP reverse shell deployment, credential cracking (John the Ripper), and privilege escalation via tar wildcard injection.
- Participated in threat modeling exercises to identify potential attack vectors across systems and applications using structured security assessment methodologies.
- Delivered structured penetration testing and vulnerability assessment reports with CVSS risk ratings, proof-of-concept evidence, and step-by-step remediation guidance aligned with NIST and OWASP standards.

Intern Cybersecurity Engineer

Jul 2025 - Nov 2025

CIB Egypt (Commercial International Bank)

- Participated in security awareness initiatives and learned incident response workflows in a banking environment governed by strict cybersecurity policies.

Student Cybersecurity Engineer

Aug 2025 - Sep 2025

Sprints x Microsoft Summer Camp – Cybersecurity

- Completed an intensive cybersecurity training covering web application security, network security, ethical hacking.
- Practiced penetration testing techniques and vulnerability scanning using Burp Suite, Nmap, and Kali Linux in guided lab environments.

Projects

Secure Software Development – Application Security Assessment

Dec 2025 - Jan 2026

- Conducted a structured application security assessment and code review of a web application, identifying security flaws in authentication, input validation, session management, and secure coding practices.
- Applied SAST concepts to review source code for vulnerabilities and produced developer-facing remediation documentation aligned with secure SDLC practices.

OWASP Juice Shop – Web Application Penetration Testing

Dec 2024 - Jan 2025

- Exploited OWASP Top 10 vulnerabilities including SQL Injection, XSS, IDOR, CSRF, and Broken Authentication; applied DAST techniques using Burp Suite (Proxy, Repeater, Intruder).
- Documented all findings with reproduction steps, severity ratings, and remediation recommendations.

Core Skills

Penetration Testing & AppSec: Web Application Pentesting, Network Pentesting, Application Security Assessment, Black-Box Testing, Vulnerability Assessment, Exploit Development, Privilege Escalation, SAST, DAST

Security Tools: Burp Suite, Proxy, Repeater, Intruder, Scanner, Nmap, Metasploit Framework, Wireshark, Gobuster, Nikto, Dirb, John the Ripper, Netcat

Vulnerability Classes: SQL Injection, XSS, CSRF, SSRF, XXE, IDOR, LFI/RFI, Broken Authentication, Command Injection, OWASP Top 10

Network & Infrastructure Security: TCP/IP, DNS, HTTP/HTTPS, Firewalls, IDS/IPS, Encryption Technologies, Network Enumeration, Service Fingerprinting

Programming & Code Review: Python, scripting & automation, Bash scripting, JavaScript, source code review, Java, reading level, C++

Secure Development: Secure SDLC, Secure Coding Practices, Code Review, Input Validation, Authentication Security

Reporting: Penetration Testing Reports, Vulnerability Assessment Reports, CVSS Risk Ratings, Remediation Documentation, Executive Summaries

Threat Identification, Risk Assessment, OWASP Top 10, CVSS Scoring

Education

Alexandria National University2023 - Present

B.Sc. Computer Science & Information Security

Minor: Network Security, Cryptography, Application Security, Secure Software Development

Languages

Arabic (Native), English (Professional Working Proficiency)
